Academic	A.I. and Robotics (For T1 existing members only)		✓	✓	✓	✓		Artificial Intelligence is a modern topic of much current interest. Most researches show this topic definitely change the world. Robotic Arm extends the application of AI for real world problems. In fact, AI requires the use of advanced mathematics. Usually we need a good foundation on mathematical training. However, due to computer programming becoming more common in education environment, we can demonstrate the function and power to student by first following examples; i.e. we can play with AI. This can stimulate participants and they would independently develop their own interest on AI topics. Robotic arms give them a chance to apply the basic AI knowledge on robotic automation.
