STEM	AI and Robotics 1	Tuesday	8	ü	ü	ü	ü	ü		<div>Artificial Intelligence is a current topic of much interest. Most research shows this area of technology has a definite and dramatic impact to the world. Robotic Arm extends the application of AI to address real world physical problems.</div> <div>In fact, AI requires the use of advanced mathematics. Usually we need a good foundation on mathematical training. However, due to computer programming becoming more common in education environment, we can demonstrate the function and power to student by first following examples; i.e. we can play with AI. This can stimulate participants and they would independently develop their own interest on AI topics.</div> <div></div>	Curiosity, Appreciation of Beauty & Excellence, Creativity
